

OMNI-2 Plus+

Diamond Wire Saw

Cuts In Any Direction

- *Faster Cutting*
- *Automatic Water Supply*
- *Blades last much longer*
- *Six blades included, along with spare chuck and guides*
- *Five-Year Warranty*

- **Automatic Water Supply** -

No more guessing how much water to supply - the built-in pump automatically supplies exactly the right amount of water to the blade. Water is recirculated from within the saw, eliminating the external supply and exhaust reservoirs. A single switch controls both the motor and the pump - no extra steps required and no mess.

- **Faster Cutting** -

Improved blades and new high speed motor cut glass faster than ever.

- **Blades last even longer** -

Because of the improved blades and the precision water flow to the blade, these unbreakable blades last much longer than before.

- **No grinding required** -

Grinds as it cuts - leaves a perfect edge that is ready to use.

- **Most economical saw you can buy** -

More than ever, the Omni-2 Plus+ Wire Saw is your best choice in a glass cutting saw. There is virtually no maintenance, very inexpensive and long lasting blades - quickly pays for itself in savings compared to any other glass saw.

- **Most reliable saw on the market** -

Rugged, simple design, professional construction and unbreakable blades. We back this quality with a limited five-year warranty.

Omni-2 Plus+

The new Omni-2 Plus+ provides a performance upgrade for the popular Omni series of diamond wire saws. The new saw offers faster cutting and longer blade life compared to the older Omni-2.

The Omni-2 Plus+ retains the popular features of the Omni-2 such as being able to cut in any direction, the built-in water pump, and near-maintenance-free operation.

As an added bonus, the Omni-2 Plus+ is shipped with a complement of six diamond blades, an extra set of blade guides and a spare chuck. It is unlikely that the operator of the Omni-2 Plus+ will need any additional parts or supplies for a very long time.

The Gryphon Omni saws use a very strong round steel wire blade that is coated all around with diamonds. The simple mechanism in the saw propels the blade up and down rapidly, enabling the operator to swiftly cut glass or other hard material. The simple design eliminates problems encountered in some other brands of saws that cause lost time, added maintenance expense and frustration.

The new Omni-2 Plus+ offers the best value today in glass cutting saws. You get a great saw for a low cost that now features much faster cutting, longer lasting blades, no expensive repair cost, is virtually maintenance free, and comes with 6 blades and all the extra accessories anyone would need.

Specifications

Motor	1/4 hp Direct Drive DC
Motor Speed	5000 rpm
Dimensions	19" tall, 14" deep, 13.5" wide
Platform Area	One Square Foot
Coolant System	Built-in automatic pump recirculates water from base of saw
Adjustments	None
Blade Base Diameter	.063"
Warranty	5 years
