

Gryphette Grinder

The small Gryphette Grinder offers great performance at an absolutely unbeatable price. The Gryphette features a DC motor that is unstoppable even when used with 1" diamond bits, and is a great choice for use in classroom and for beginning glass artists. The compact size and high performance will also appeal to any glass artist with limited space. The grinder ships with a 3/4" grinding bit and flexible spray guards. Additionally, it accepts all standard bits. A face shield is available as a low-cost option.

The Gryphette is simple and well built, and these factors allow us to offer a five-year warranty.
