

The Gryphon Twister

Gryphon

Twister
Convertible Grinder
Patent Pending

Gryphon offers the biggest innovation in glass grinders since the first grinder was introduced nearly thirty years ago. With a simple twist of the base, the Gryphon Twister converts from a standard flat glass grinder to a slanted grinder. This slant allows you sit or stand and grind with greater ease, less strain and better visibility. You won't fully appreciate the improvement in comfort until you try it yourself.

An automatic pump provides ample clean water to the bit in either position - no sponge is required. The Twister comes complete with two new Gryphon Slip-On diamond bits, removable Second Story, clear Face Shield and a Five-Year Warranty.

Do yourself and your back a favor - try the remarkable Gryphon Twister at your dealer soon.
